

PROFESSIONAL SUMMARY

Full Stack Developer with experience building scalable web applications, RESTful APIs, and enterprise solutions using React.js, Node.js, Express.js, MongoDB, and Python/Django. Experienced in building production-ready backend services, AI-powered applications, and third-party integrations using Agile methodologies, software design principles, and clean coding practices. Awarded Rising Star of the Quarter for delivering high-impact solutions and driving business efficiency.

WORK EXPERIENCE

- Associate Full Stack Developer - Conversion Pro LLP

Dec 2024 - July 2026

 - Built a centralized marketing analytics platform using React.js, Node.js, and MongoDB, consolidating marketplace and advertising data into a unified dashboard with AI-driven performance insights.
 - Created an automated QA testing platform using React.js, Node.js, and MySQL to validate performance, responsiveness, broken links, and checkout workflows, significantly reducing manual testing effort and improving release quality.
 - Developed a Node.js-based EDI integration platform that automated SPS Commerce purchase order processing, reducing manual effort and improving workflow efficiency.
 - Engineered a MERN-based real-time reporting dashboard, reducing reporting turnaround time by 50% and improving operational visibility.
 - Built and maintained REST API integrations and business automation workflows across multiple enterprise systems, streamlining order, inventory, and financial operations while reducing manual intervention by 70%.
 - Contributed to the redevelopment of an ERP-integrated e-commerce platform, improving scalability and supporting 2× higher transaction volumes.
 - Optimized and customized a B2B e-commerce platform, improving application performance and reducing page load times by 30%.
 - Developed and maintained client-facing web applications and CMS solutions, ensuring high-quality releases and on-time project delivery.
- Web Development Intern - Adityapur Auto Cluster

Feb 2023 - Apr 2023

 - Engineered responsive web applications using JavaScript, Bootstrap, Python, and Django, applying full-stack development principles and modern web technologies.
 - Designed and delivered database-driven solutions including an e-learning platform and music streaming application, enhancing user engagement through intuitive interfaces and scalable backend systems.

TECHNICAL SKILLS

Programming Languages	JavaScript, Python
Frontend	React.js, Redux, HTML, CSS, Bootstrap, Tailwind CSS, jQuery, Material UI, Framer Motion
Backend	Node.js, Express.js, Django, REST APIs
Databases	MongoDB, MySQL, SQLite
CMS & Tools	Shopify, Zoho CRM, Git, GitHub, Postman
Core Concepts	API Integration, EDI Systems, REST Architecture, Database Design, Performance Optimization

PERSONAL PROJECTS

- FlowSync ERP

Live demo ↗

Tools: React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Socket.IO, Google Gemini, Framer Motion

 - Developed a full-stack ERP/business management platform with RBAC, granular permissions, authentication, order lifecycle management, analytics dashboards, and RESTful APIs using the MERN Stack.
 - Implemented real-time updates and notifications using Socket.IO, including role- and permission-based communication for orders and employee management.
 - Integrated Google Gemini AI to provide a role- and permission-aware application assistant with authenticated conversation history and rate-limited requests.

EDUCATION

Bachelor of Computer Applications (BCA)	2020 - 2023
Jamshedpur Women's College
